ARTS CENTRE

The Arts Centre is a flexible arts space comprising two galleries, an art shop, performance space, rehearsal rooms and a visual art studio. It is home to several local arts groups and is very much a part of the local community.

To support local artists and the community, the Arts Centre delivers an annual program of exhibitions, events, arts workshops and performances. Events and activities reflect local history, character and culture, positively contributing to the identity and vibrancy of our community.

Located within the beautiful seaside suburb of Port Noarlunga, a visit to the Arts Centre can be combined with a short walk to the Onkaparinga River, the beach and a visit to the many cafés and shops in the township.

The Arts Centre is in the old institute building on Gawler Street. The institute opened in 1924, and has since played an important role in the creative and cultural life of the region; for many years as a performance space and previously as one of the only movie theatres in the Fleurieu Peninsula.

This role is continued today through the Arts Centre, as a hub for the arts in the south. The centre blends support for local artists with a mix of entertainers and performances from outside the region. This provides the community with access to shows they may not otherwise have an opportunity to experience.

Annual, signature events now include the Beanie to Berets exhibition and its associated Textile Market in winter, along with the Surf Art Exhibition and Surf Art Christmas Market, and the annual Reconciliation Week Concert.

The performance space, rehearsal rooms and visual arts studio are available for hire, for the presentation of performances, events, workshops and functions, with technical and event management support available from the Arts Centre team.

Onkaparinga Gallery: 15 March – 29 April

This exhibition brings together two bodies of work that explore the complex feelings and emotions that are experienced in life, underpinned by the events, interactions and relationships that shape our existence.

Transcience presents aging as a paradigm, suggesting that as we age, relevance is replaced with nostalgic ideals. This series of paintings explores feelings of loss, melancholy, love and courage, reflective of a life lived.

Small Calamities presents a series of sculptures that use a simple duality of spheres and cubes to represent the critical events, interactions and relationships that provoke emotional responses and influence our experience of life.

The contrast between the mediums offers an exhibition that is simultaneously representative of tradition and culture and self-reflective interpretation.

Mapping the Landscape

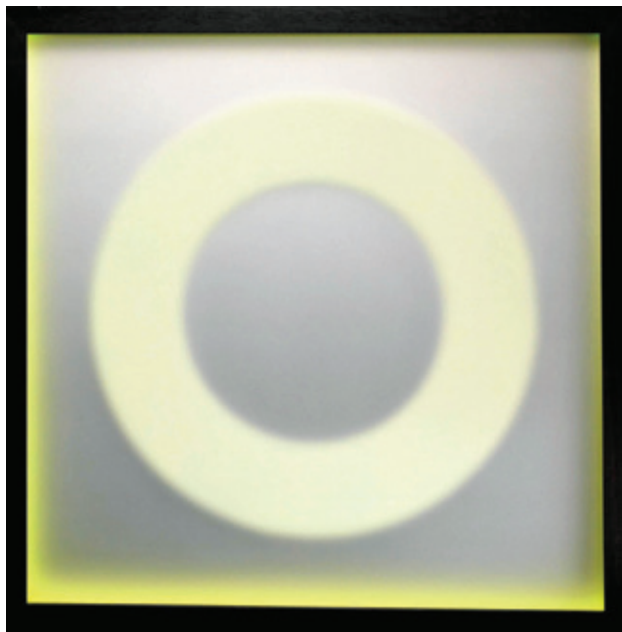

DONNA HEDSTRÖM GOLD

Red Rover Gallery: 21 June – 5 August

In this exhibition, Donna uses mixed media to offer a twist on traditional landscape painting that sits somewhere between representational and abstract.

The idea of mapping the landscape is a metaphor of finding parts of ourselves, through being in relationship with the natural world, time and space. We understand the world around us through information we collect via our senses.

Through inquiring into our experience of relating to the natural world, we can come to know more about what is important to us. Donna is drawn to texture and a variety of materials to capture the sensory experience of being human.

Monika Morgenstern

THE RADIANT NOW

Onkaparinga Gallery: 9 August – 9 September

Monika Morgenstern's art delves deeply into the idea of the numinous in an ethereal and atmospheric abstract manner and she invites you to an encounter with the unknown.

Colour and its perceptual potency have been a longstanding preoccupation in Morgenstern's work and she is interested in exploring it as a carrier of meaning with explicit reference to concepts of the spiritual and the 'blur'.

Inspired by the German philosophical tradition of the ineffable, her work investigates colour as a gateway to the unknown. In particular, the

communicative power and ethereal states of colour in different forms of matter. Colour is presented as a luminous image in solid form and through veils of glass. The effect is immersive and provides a highly sensory experience for audiences.
